- Winner of the German Wallet Project

The EUDI Wallet & eIDAS ecosystem

electronic IDentification, Authentication and trust Services

eIDAS 2.0 will change identification, authentication and credentialing in the EU

Regulatory environment

- eIDAS 2.0 introduces a European Digital Identity Wallet (**EUDI Wallet**) for all citizens in the EU
- **Harmonization** between eIDAS 2, AMLR and PSD2/3
- The EUDI-Wallets of all member states must be **interoperable**
- First governments announced availability by **2025**

Why is eIDAS relevant for you?

- Regulatory acceptance **obligation** in certain sectors
- High cost savings, e.g. in **KYC processes**
- Opportunity for **process optimisation** and digitalisation
- Enabler for **new business models**

The functional scope of EUDI Wallets goes far beyond mere identification for natural persons

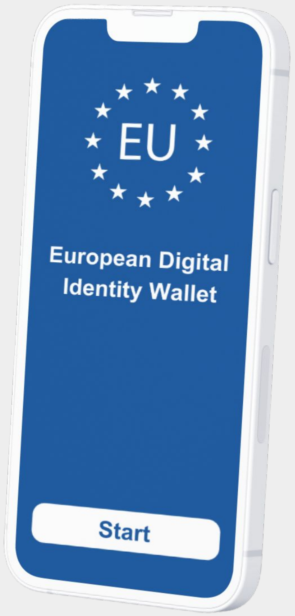
What an EUDI Wallet contains

Person identification Data (PID)
Official identity

Qualified certificate (QEAA)
- Digital driver license
- Address & Tax data
- Education certificate

Non-qualified attributes
- Employee ID
- Loyalty cards & Tickets
- Access cards

Self-defined attributes
Pseudonyms, Preferences, Sizes



What an EUDI Wallet enables

Identification
Digital and physical spaces

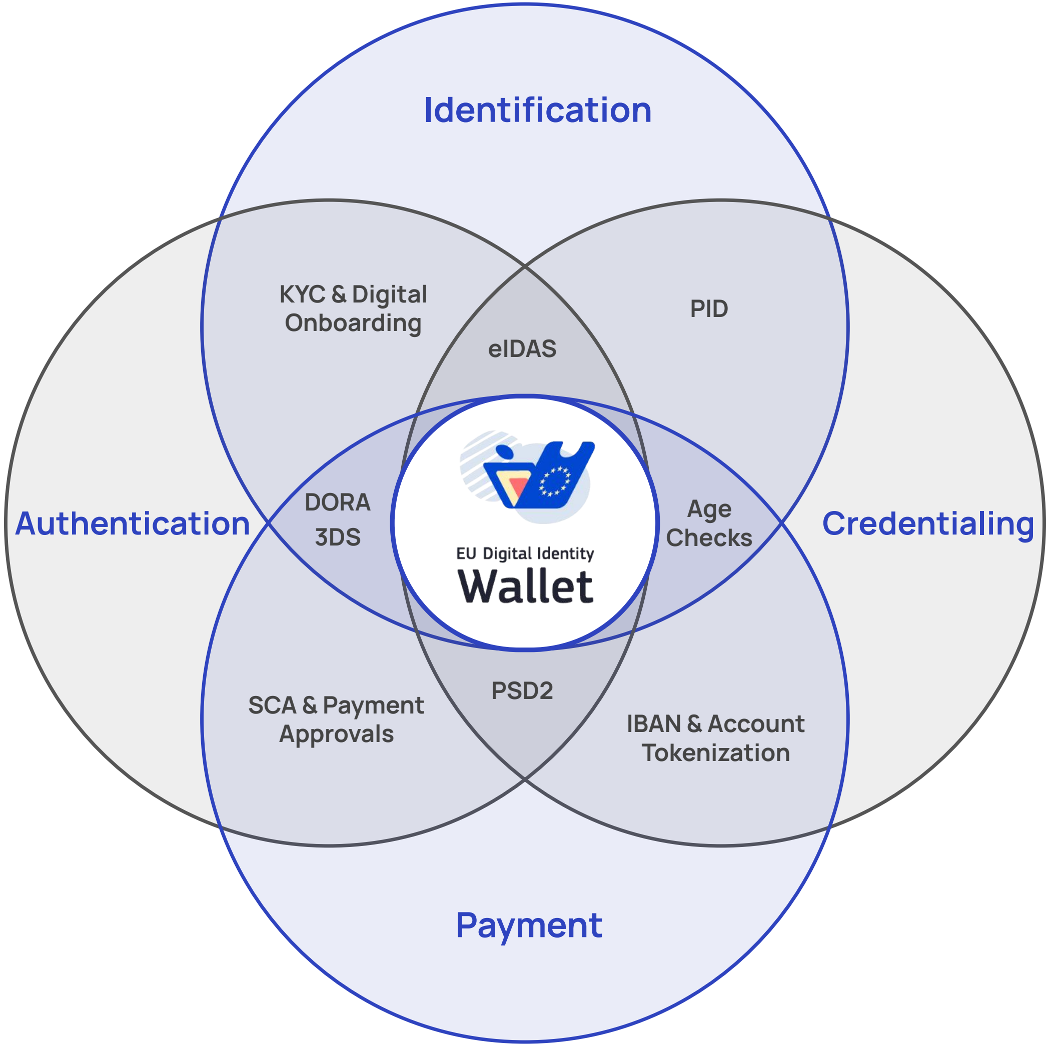
Authentication
- Passwordless login
- Physical building access
- Strong Customer Auth (SCA)
- Payment approvals

Electronic signatures
Qualified & Advanced signatures

Dashboard
Full interaction history view

The EUDI Wallet: The Ultimate Convergence Point

Bridging identification, authentication, credentials, and payments.



Lissi@ Large Scale Pilots
